DUTCH SEC

Powerful cooperation with DutchSec, supplier of Smart Security, Big Data Analytics and Vulnerability Checks

- **Introduction DutchSec**

- **Stop and prevent Cyberattacks**

- **Active Threat Hunting Suite**

- **Why DutchSec?**

- **Nias2018**

Dear,

We are expanding our Cyber Security Solutions with DutchSec to support the growing needs for custom-made security tooling and services in Europe.

Introduction DutchSec

Centrally Located in Netherlands, the Utrecht security company DutchSec was founded in 2016 by Remco Verhoef and Bas Eikelenboom, both veterans in their field. Remco is a celebrated cybersecurity specialist, entrepreneur and software developer. Bas has established several IT security companies in the past and was, among other things, project leader of High Tech Crime at the national police. Remco and Bas have now combined their knowledge and experience in DutchSec to provide companies with smart security software and services.

Achter de Dom 14
Utrecht

What if we could stop cyberattacks before they can harm your business?

In order to maintain focus on the development of the innovative security tools they work with Tucana to market and distribute their state of the art solutions. Their motto is that Cyber security must be affordable for everyone and to safeguard the evolution of security technology and therewith humanity.

**Security is what we do.
Safety is what you get.**

Active Threat Hunting Suite

Their superb machine learning algorithms and usage of additional statistical analyzes allow their tools to make better predictions and decisions. This data driven decision process is called Data and Context Driven Security.

The Active Threat Hunting Suite is flexible build up and expandable with many options. Think about smart Honeytraps, programmable firewalls, Log and flow monitors with additional anaylzers and visualization tools.

Why Tucana added the Cyber Security solutions from DutchSec

The tools do not only allow you to hunt for the attackers, but also deliver deception that allows your company to analyse the hackers better.

DutchSec believes in Open Source and shares a lot of the knowledge and tools via an open source license to allow other security people to make use of them.

The DutchSec products are a great fit in the Cyber Security solutions from Tucana. We have the experience and solutions to help you with the improvement of your visibility, performance and security.

.

Tucana and DutchSec join forces at the NIAS2018
