

Development Solutions announces dsClient GUI Enhancements

Our Partner **Developing Solutions**® announces a major enhancement of their graphical user interface for the **dsTest**® suite of products. With **dsClient**™ GUI, users can now create **SmartFlow/SmartEvents**™ state machines using a visual, drag-n-drop wizard. With the wizard, users can draw a state machine diagram on a canvas and **dsClient** GUI will build the corresponding XML configuration. State machines can be easily modified by inserting or deleting the corresponding graphical representations of states and event handlers on the canvas. The GUI supports interactions between multiple protocols within a single **SmartFlow** or **SmartEvents** state machine, and the configuration is automatically validated against the dsTest schema while it is being built. An image file of the resulting state diagram can be produced for inclusion in user documentation.

Click to see a representation of the drag-n-drop wizard.

About Development Solutions

Developing Solutions® focuses on providing test solutions for core network interfaces in Policy & Charging Control (PCC), Subscriber Management, Authentication Accounting & Authorization (AAA), and Diameter Routing Agents (DRA). **Developing Solutions** was founded in 2002, and has extensive experience in the Telecom and Datacom industries, including both NEM and test equipment manufacturers.
